## **DETAILED ACTION**

### ***Election/Restrictions***

Based upon the claims as instantly amended, a restriction requirement is deemed necessary at this time as set forth below.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 103, 105, 108- 113, drawn to a compound of hydroxyacetyl- Asn- Tyr- NH<sub>2</sub> or pharmaceutically acceptable salt thereof, classified in class 514, subclass 9.
- II. Claims 103, 105, 108, 109, 114-117, drawn to a compound of hydroxyacetyl- Asn- Tyr- OH or pharmaceutically acceptable salt thereof, classified in class 514, subclass 9.
- III. Claims 103, 105, 108, 109, 118-121, drawn to a compound of hydroxyacetyl- Gly- Tyr- NH<sub>2</sub> or pharmaceutically acceptable salt thereof, classified in class 514, subclass 9.
- IV. Claims 103, 105, 108, 109, 122-125, drawn to a compound of hydroxyacetyl- Gly- Tyr- OH or pharmaceutically acceptable salt thereof, classified in class 514, subclass 9.

- V. Claims 103, 105, 108, 109, 126-129, drawn to a compound of acetyl- Asn- Tyr- NH<sub>2</sub> or pharmaceutically acceptable salt thereof, classified in class 514, subclass 9.
- VI. Claims 103, 105, 108, 109, 130-133, drawn to a compound of acetyl- Asn- Tyr- OH or pharmaceutically acceptable salt thereof, classified in class 514, subclass 9.
- VII. Claims 103, 105, 108, 109, 134-137, drawn to a compound of acetyl- Gly- Tyr- NH<sub>2</sub> or pharmaceutically acceptable salt thereof, classified in class 514, subclass 9.
- VIII. Claims 103, 105, 108, 109, 138-141, drawn to a compound of acetyl- Gly- Tyr- OH or pharmaceutically acceptable salt thereof, classified in class 514, subclass 9.

The inventions are distinct each from the other because of the following reasons:

Inventions of groups I-VIII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the eight different inventions are structurally different and are mutually exclusive.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ROY TELLER whose telephone number is (571)272-0971. The examiner can normally be reached on Monday-Friday from 5:30 am to 2:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang, can be reached on 571-272-0562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
